

Gitennes' JMW Gold Property Diamond Drilling Commences, Chapais-Chibougamau area, Quebec

Vancouver, B.C., - December 5, 2022: Gitennes Exploration Inc. ("Gitennes" or the "Company") - (TSXV – GIT) announces that diamond drilling has commenced on its 100% owned JMW gold property in the Chapais-Chibougamau area of Quebec (see Figure 2). The JMW property was recently optioned to Newfoundland Discovery Corp. and Gitennes is the operator.

The diamond drilling programme is planned for approximately 1,200 metres in six holes and will follow up on results of Gitennes' Induced Polarization ("IP") geophysical survey and historical work. Three distinct styles of mineralization/targets have been identified on JMW (Figure 2) and thirteen zones of interest from the IP survey are highlighted by chargeability anomalies (See Figure 2 dark lines). Strong anomalies occur in the sedimentary rocks and these rocks are known to host gold deposits and occurrences in the Chapais-Chibougamau area. The planned drilling programme will target both sedimentary and intrusive rocks.
